

Introduction

Welcome to **Quants.Space** (“Quants.Space”, “we”, “our”, “us”).

We operate a technology platform that **aggregates, processes, and recreates quantitative trading data** to provide analytics, strategy insights, and research tools for allocators, trading teams, and platform users.

Quants.Space is designed to operate with **minimal user verification**.

We do not conduct Know Your Customer (KYC) or Know Your Business (KYB) checks, and we do not request government-issued identification, proof of address, corporate documents, or any other legally-verifiable identity materials.

This Privacy Policy explains:

- what personal data we *do* and *do not* process
- how we use and store the information we collect
- how users may exercise their privacy rights
- how data is protected
- the scope and limitations of our processing

By accessing or using Quants.Space, you agree to the terms of this Privacy Policy.

2. What Quants.Space Does — and Does Not — Collect

2.1 No KYC / No KYB Data

Quants.Space **does not collect or process identity verification data**, such as:

- passport or ID details
- residential or corporate addresses
- proof of incorporation

- bank statements
- source-of-funds documents
- tax IDs
- selfies or biometric identifiers

We do **not** verify or authenticate the identity of our users.

2.2 Information We Collect Automatically

When you interact with Quants.Space, we may automatically collect **non-KYC technical data**, including:

- device information (browser type, operating system)
- IP address (for security, fraud prevention and platform diagnostics)
- log data (usage timestamps, interaction patterns)
- cookie identifiers
- analytics data (page interactions, performance metrics)

This information is collected to operate, secure, and improve the platform.

2.3 Information You Provide Voluntarily

Users may provide limited information such as:

- **email address** (for platform access and notifications)
- **password** (stored securely using encryption or hashing)
- optional contact details, if voluntarily submitted
- communications to our team (support requests, inquiries)

We intentionally limit personal data collection according to the principle of **data minimization**.

2.4 Trading Strategy & Operational Data

Quants.Space's core function is to **recreate, normalize, and display quantitative trading performance data submitted by strategy providers.**

This may include:

- anonymized or pseudonymized performance metrics
- strategy statistics (Sharpe, Sortino, drawdowns, volatility)
- live-trading analytics
- execution-level returns and risk metrics

This data is not tied to verified user identities.

It is provided either anonymously, through API keys, or through non-identifiable uploads.

We do **not** use this data to copy-trade, replicate proprietary alpha, or compete with strategy providers.

3. Purpose of Processing

We process data for the following legitimate and clearly-defined purposes:

1. **Platform operation and account management**
2. **Analytics and performance visualization**
3. **Security and fraud monitoring**
4. **User support and communication**
5. **Improving platform functionality**
6. **Aggregating and recreating trading data for display**
7. **Compliance with general legal obligations** (e.g., responding to law enforcement where applicable)

We do **not** sell personal data.

We do **not** use trading data to reverse-engineer or replicate proprietary strategies.

4. Legal Basis for Processing

Where applicable privacy laws (e.g., GDPR) require a legal basis, Quants.Space relies on:

- **Legitimate interest** (platform security, analytics, platform operation)
- **Contractual necessity** (providing access to the platform)
- **User consent** (cookies, optional marketing communications)

We do not rely on legal bases associated with identity verification, since KYC/KYB is not performed.

5. Data Sharing

We may share limited personal data with:

5.1 Service Providers

Such as:

- cloud hosting providers
- analytics platforms
- communication tools
- security and monitoring services

These entities act under confidentiality and data-processing agreements.

5.2 Strategy Providers (in limited cases)

If a user explicitly requests contact with a strategy provider, we may share the email address or message with that provider.

5.3 Legal & Regulatory Authorities

Only when required by law, court order, or government request.

We do not share or sell user data for advertising purposes.

6. Data Retention

We retain:

- **account data** for as long as the account remains active
- **log and analytics data** for operational and security reasons, generally 6–24 months
- **trading strategy data** for as long as users keep it available on the platform
- **support communications** for record-keeping and dispute resolution

Users may request deletion as outlined in Section 9.

7. Data Security

Quants.Space implements industry-standard measures including:

- encryption in transit and at rest
- hashed and salted password storage
- access controls and segregation of duties
- monitoring for suspicious activity
- vulnerability testing and security audits

Because we do not collect sensitive identity documents, the risk profile related to identity theft is significantly reduced.

8. Cookies & Similar Technologies

Cookies may be used to:

- maintain session integrity
- enhance user experience
- analyze platform performance
- remember preferences

Users may disable cookies through their browser settings, although the platform may function with limited capability.

9. User Rights

Where applicable under GDPR/CCPA or similar frameworks, users may have rights to:

- request access to their data
- request correction of inaccurate information
- request deletion of their account
- object to certain processing
- withdraw consent (e.g., for cookies or marketing)
- request data portability

Because we do not process identity documents, verification of a rights request may involve confirming control of the associated email address.

10. International Data Transfers

Depending on where users access the platform, their data may be stored or processed in jurisdictions outside their home country.

We ensure adequate safeguards (e.g., model clauses, data-processing agreements) when required.

11. No KYC/KYB Disclaimer

To avoid any misunderstanding:

- Quants.Space **does not** provide financial services requiring identity verification.
- Quants.Space **does not** custody user funds.
- Quants.Space **does not** onboard investors or perform due-diligence checks.
- Quants.Space **does not** collect or process legally-mandated identity information.

Users remain solely responsible for their own regulatory compliance when interacting with third-party trading teams, allocators, or financial intermediaries.

14. Changes to This Policy

We may update this Privacy Policy from time to time.

Revisions will be posted on this page with an updated “Last Updated” date.
